

# Internship

## Departments:

- Method Engineering (Composite or Assembly): 1 position
- Process Engineering (Sheet Metal): 1 position
- Quality (new processes/products, First Article Inspection): 1 position

**When & where:** June - September 2025, Badeni, com Moldovenesti

**Apply here:** [SAT.recrutare@sonaca.com](mailto:SAT.recrutare@sonaca.com) until **10.06.2025** e.o.d.

**We offer** not just a real and unforgettable experience, but also monthly salary, meal vouchers and fuel reimbursement with OMV card

# Internship

## where & what will you do

In the **Method Engineering** team, in the Composites or Assembly line, you will work with other method engineers to document and refine the method for producing fiberglass and carbon fiber parts for Embraer or Ariane 6 or for assembling primary aluminum components in Airbus aircraft slats.

The **Process Engineering** team includes engineers in thermal processes, press forming or acid surface treatment. The activity takes place in the new factory where you will work with our colleagues to detail and document new processes and technological flow

In the **Quality** team we ensure that all products meet the standards agreed with the customer. Here you will have the opportunity to know and work on our process, from documenting the processes to verifying the conformity of the products.
